FIRST COUNT

1. Plaintiffs repeat the prior allegations of this Complaint.

2. Defendants, at all times material hereto, acted through their respective officers, employees and agents, who in turn were acting within the scope of their authority and employment in furtherance of the business of defendants.

3. Defendants were engaged, directly or indirectly, in the mining, milling, producing, processing, compounding, converting, selling, merchandising, supplying, distributing or installing of asbestos containing products and raw asbestos fiber of various kinds and grades, or of products, including equipment, which defendants knew or should have foreseen would be used with asbestos containing products and/or raw asbestos fiber (hereinafter collectively referred to as "asbestos products").

4. Defendants, directly or indirectly, caused their asbestos products to be sold to or used at plaintiffs' place of employment.

5. Plaintiffs, during their employment, were exposed to and came in contact with defendants' asbestos products and inhaled or ingested the asbestos dust and fibers emanating from defendants' asbestos products.

6. As a direct and proximate result of plaintiffs' inhalation and ingestion of dust particles and fibers from defendants' asbestos products, plaintiffs developed permanent and disabling personal injuries.

7. During the time that defendants mined, milled, produced, processed, compounded, converted, sold, merchandised, distributed, supplied and installed their asbestos products, defendants knew, or in the exercise of reasonable care should have known, that their asbestos products were defective, ultra-hazardous, dangerous and otherwise highly harmful to plaintiffs.

8. Defendants knew, or in the exercise of reasonable care should have known, that the use of their asbestos products would cause asbestos dust and fibers to be released into the air and would create dangerous and unreasonable risk of injury to the lungs, respiratory systems, larynx, stomach and other bodily organs of users of their products and to others breathing that air and coming into contact with that dust.

9. Plaintiffs did not know the nature and extent of the injury that would result from contact with and exposure to defendants' asbestos products or from the inhalation or ingestion of the asbestos dust and fibers.

10. Defendants knew, or in the exercise of reasonable care should have known, that plaintiffs would come into contact with and be exposed to their asbestos products and would inhale or ingest asbestos dust and fibers as a result of the ordinary and foreseeable use of defendants' asbestos products.

11. Despite the facts as set forth above, defendants negligently, recklessly and intentionally:

(a) mined, milled, produced, processed, compounded, converted, sold, supplied, merchandised, distributed,

installed or otherwise placed in the stream of commerce asbestos products which defendants knew or in the exercise of reasonable care should have known, were defective, dangerous, ultrahazardous and otherwise unreasonably harmful to plaintiffs;

(b) failed to take reasonable precautions or exercise reasonable care to warn plaintiff adequately of the risks, dangers and harm to which plaintiffs would be exposed by exposure to, contact with, use and handling of defendants' asbestos products, or by inhalation or ingestion of the asbestos dust and fibers resulting from the ordinary and foreseeable use of defendants' asbestos products;

(c) failed to provide information or reasonably safe and sufficient safeguards, wearing apparel, proper equipment and appliances necessary to protect plaintiffs from being injured, poisoned, disabled, killed, or otherwise harmed by working with, using, handling, coming into contact with, and being exposed to defendants' asbestos products, or by inhalation or ingestion of the asbestos dust and fibers resulting from the ordinary and foreseeable use of defendants' asbestos products;

(d) failed to package their asbestos products in manner that would assure that plaintiffs would not come into contact with or be exposed to the asbestos dust and fibers resulting from the ordinary and foreseeable use of defendants' asbestos products;

(e) failed to advise plaintiffs of the necessity to adopt and enforce a safe, sufficient and proper method and

plan of working with, using, handling, coming into contact with and being exposed to defendants' asbestos products so that plaintiffs would not inhale or ingest the asbestos dust and fibers resulting from the ordinary and foreseeable use of defendants' asbestos products;

(f) ignored and suppressed medical and scientific information, studies, tests, data and literature which defendants acquired during the course of their normal business activities concerning the risk of asbestosis, scarred lungs, cancer, mesothelioma, respiratory disorders, and other illnesses and diseases to workers such as plaintiffs, and other persons similarly situated, who were exposed to defendants' asbestos products;

(g) disregarded medical and scientific information, studies, tests, data and literature concerning the causal relationship between the inhalation or ingestion of asbestos dust and fibers, and such diseases as asbestosis, mesothelioma, scarred lungs, cancer, respiratory disorders and other illnesses and diseases;

(h) exposed and continued to expose plaintiffs, and other persons similarly situated, to the risk of developing asbestosis, mesothelioma, scarred lungs, cancer and other illnesses, all of which risks defendants knew, or in the exercise of reasonable care should have known, were consequences of exposure to asbestos dust and fibers;

(i) failed to seek substitute materials in lieu of the use of their asbestos;

(j) failed to advise plaintiffs, who defendants knew, or in the exercise of reasonable care should have known, had been exposed to inhalation or ingestion of asbestos dust and fibers resulting from the ordinary and foreseeable use of defendants' asbestos products: to cease further uncontrolled or unprotected exposure to asbestos products and the inhalation or ingestion of asbestos dust and fibers and all other kinds of smoke, dusts, and fumes; to be examined by competent medical doctors to determine the nature and extent of any and all diseases caused by inhalation or ingestion of asbestos dust and fibers; and to receive medical care and treatment for such diseases; and

(k) defendants' otherwise acted negligently, recklessly and with intentional disregard for the welfare of plaintiffs in the mining, milling, producing, processing, compounding, converting, selling, merchandising, supplying, distributing, installing, or otherwise placing in the stream of commerce their asbestos products.

12. As a direct and proximate result of the acts and omissions of defendants, plaintiffs were exposed to and came in contact with defendants' asbestos products and inhaled or ingested asbestos dust and fibers resulting from the ordinary and foreseeable use of said asbestos products. Plaintiffs were caused to suffer severe, permanent and disabling personal

injuries or death and to be placed at increased risk of developing other serious bodily injury, have expended and will be caused to expend sums of money for medical care and treatment related thereto, have been prevented and will be prevented from pursuing their normal activities and employment, have experienced and will continue to experience severe pain and suffering and mental anguish, and have been deprived and will continue to be deprived of their ordinary pursuits and enjoyments of life.

3. Defendants breached said warranties in that their asbestos products were defective, ultrahazardous, dangerous, unfit for use, not merchantable, and not safe for their intended, ordinary and foreseeable use and purpose.

4. As a direct and proximate result of defendants' breach of warranties, plaintiffs were exposed to and came in contact with defendants' asbestos products and inhaled or ingested asbestos dust and fibers resulting from the ordinary and foreseeable use of defendants' asbestos products. (f) defendants' asbestos products were defective in that they were incapable of being made safe for their ordinary and intended use and purpose, and defendants failed to give any warnings or instructions, or failed to give adequate or sufficient warnings or instructions, about the risks, dangers, and harm associated with the use of their asbestos products.

3. As a consequence of the defective condition of defendants' asbestos products, plaintiffs inhaled or ingested asbestos dust and fibers during ordinary and foreseeable use of those asbestos products.
