

How to Set Up Mozilla Firefox to use Adobe Reader

(Please make sure you have Adobe Reader installed before following these directions)

- 1 Launch Mozilla Firefox. Look for Mozilla Firefox on your computer and open it. The web browser will load. Click on three lines in the upper right corner of the browser to open the main menu.
- 2 Click on “Options.” The Options page will load in a new tab.

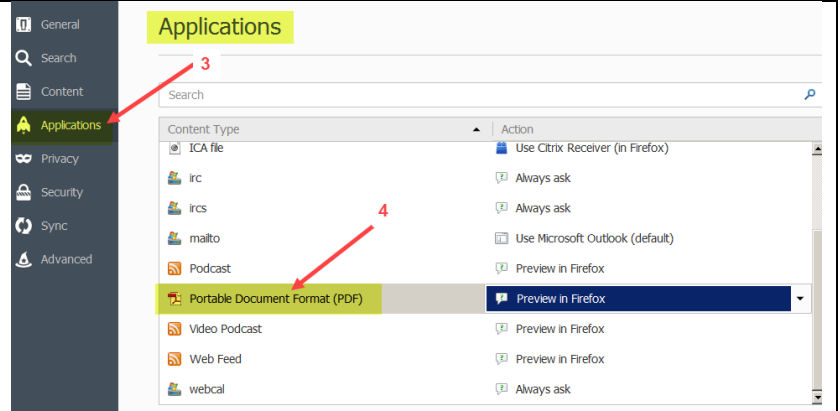

You can also access this via Menu Bar → Tools → Options.

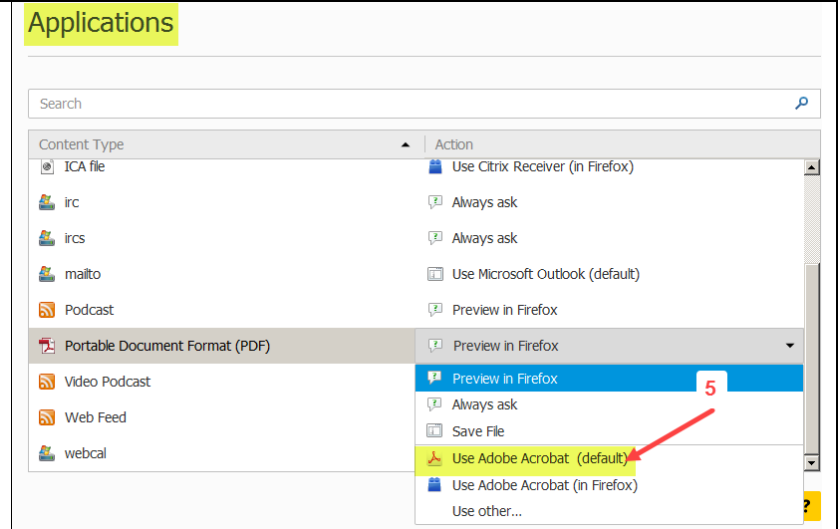

3 Show Applications Options.

4 Scroll and look for Content Type of “Portable Document Format (PDF)”.

Note: your screen may have different options, or be in a different order that the snapshot shows.

5 Select “Use Adobe Acrobat (default)” from the drops down list.

6 This is the correct set up.

Return to our website for the PDF that you wanted to open, and click on the link. Any PDF file will now open in a separate window with Adobe Reader.
