LAW FIRM SIZE

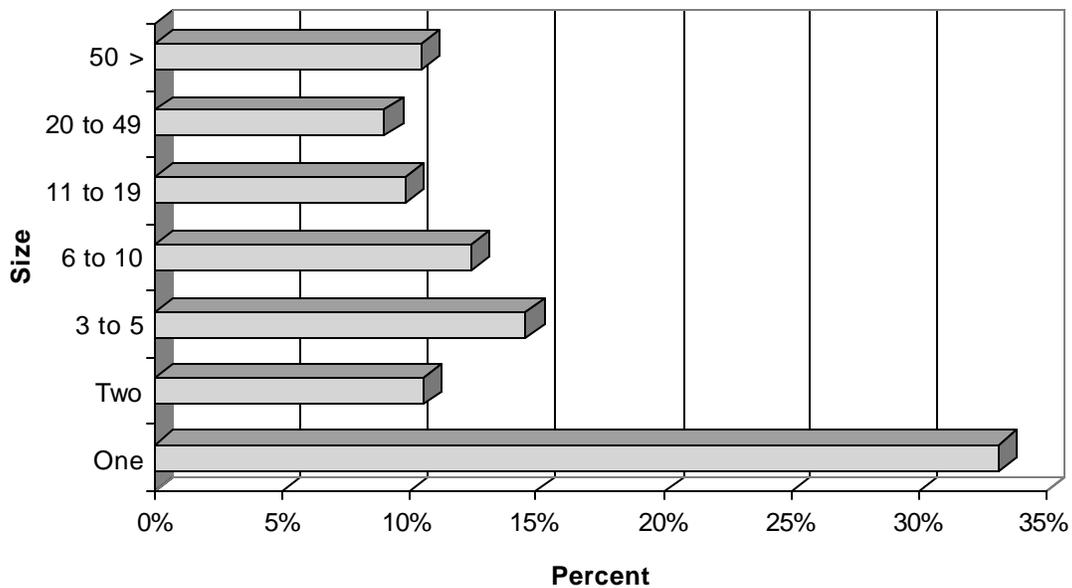

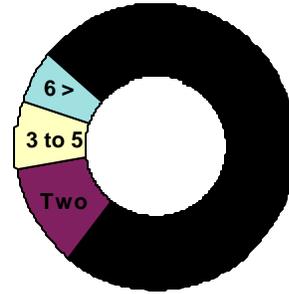

Figure 42

NUMBER OF LAW FIRMS

No exact figures on the number of private practice law firms in New Jersey exists. Nevertheless, a reasonably accurate estimate can be made based on the 29,979 attorneys who responded to indicate the size of their law firm. In each firm size category that was non-exclusive (i.e. other than 1 or 2), the total number of attorneys responding was divided by the number representing the mid-point in that category. For firms in excess of 50 attorneys, the total number of attorneys responding were divided by 50. Almost three-quarters of all law firms (74.0%) were single practice firms. Two person firms represented 11.8% of all private practice firms, while firms of between 3 to 5 comprised 8.1%. Only 5.9% of all of the law firms in New Jersey had 6 or more attorneys. These figures are graphically shown to the right and are statistically set forth below.
