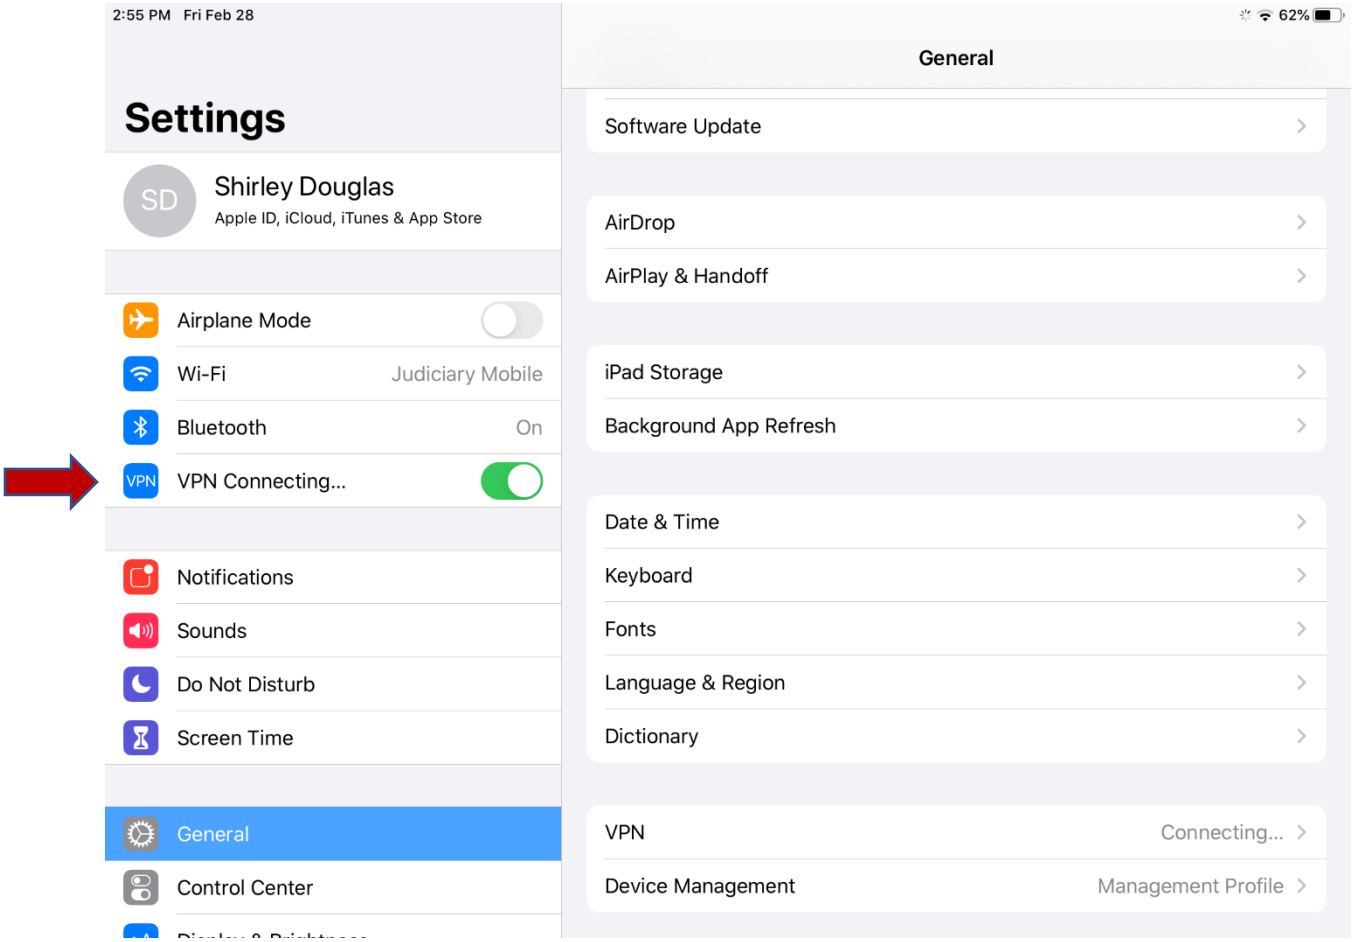
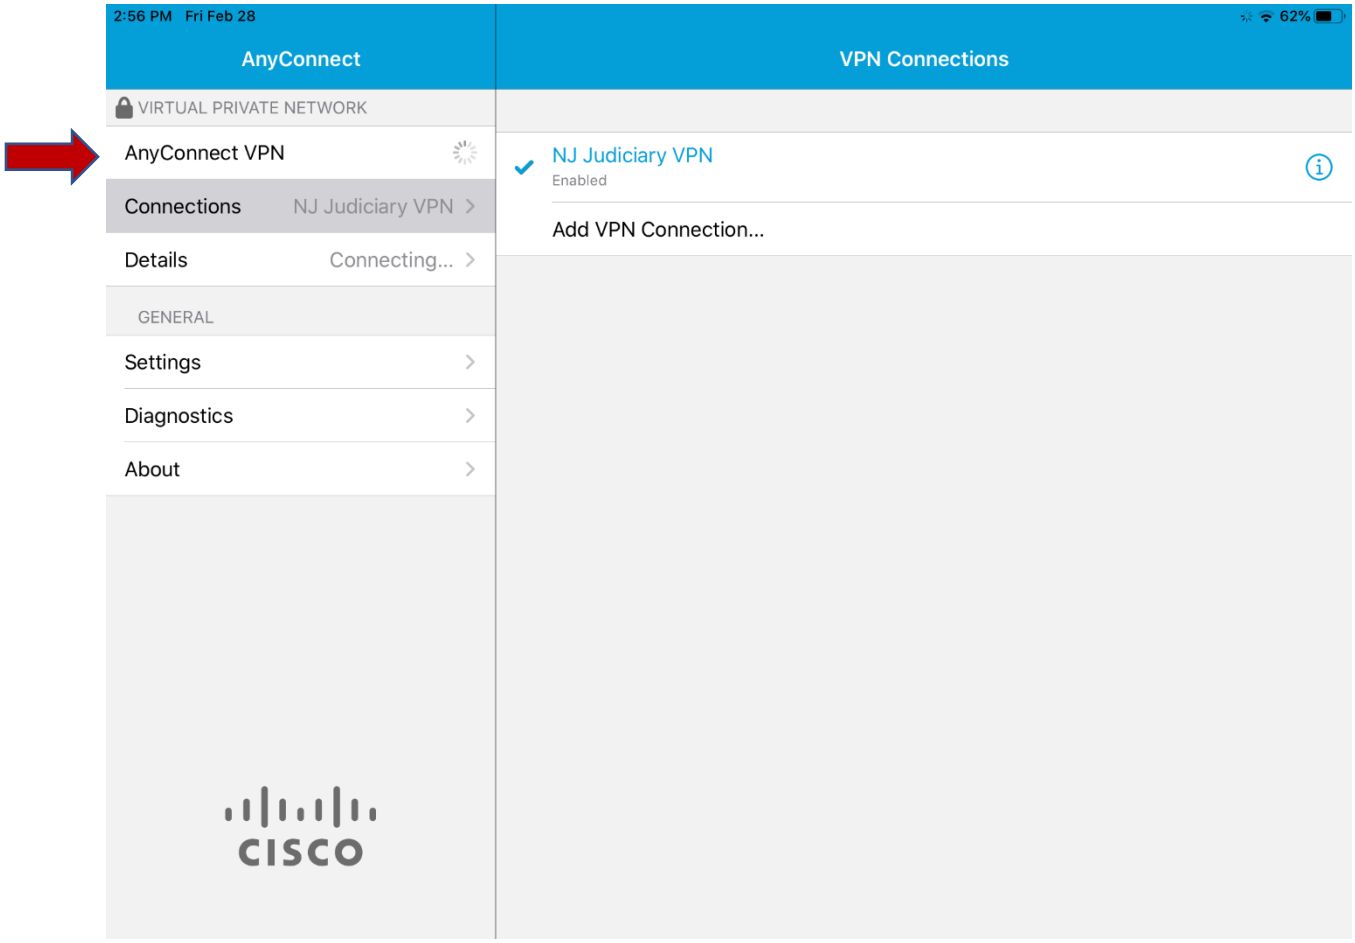
How to connect to AnyConnect VPN using an iPad:

1. Login to your iPad
2. Open Setting
3. Turn on the VPN (red arrow)

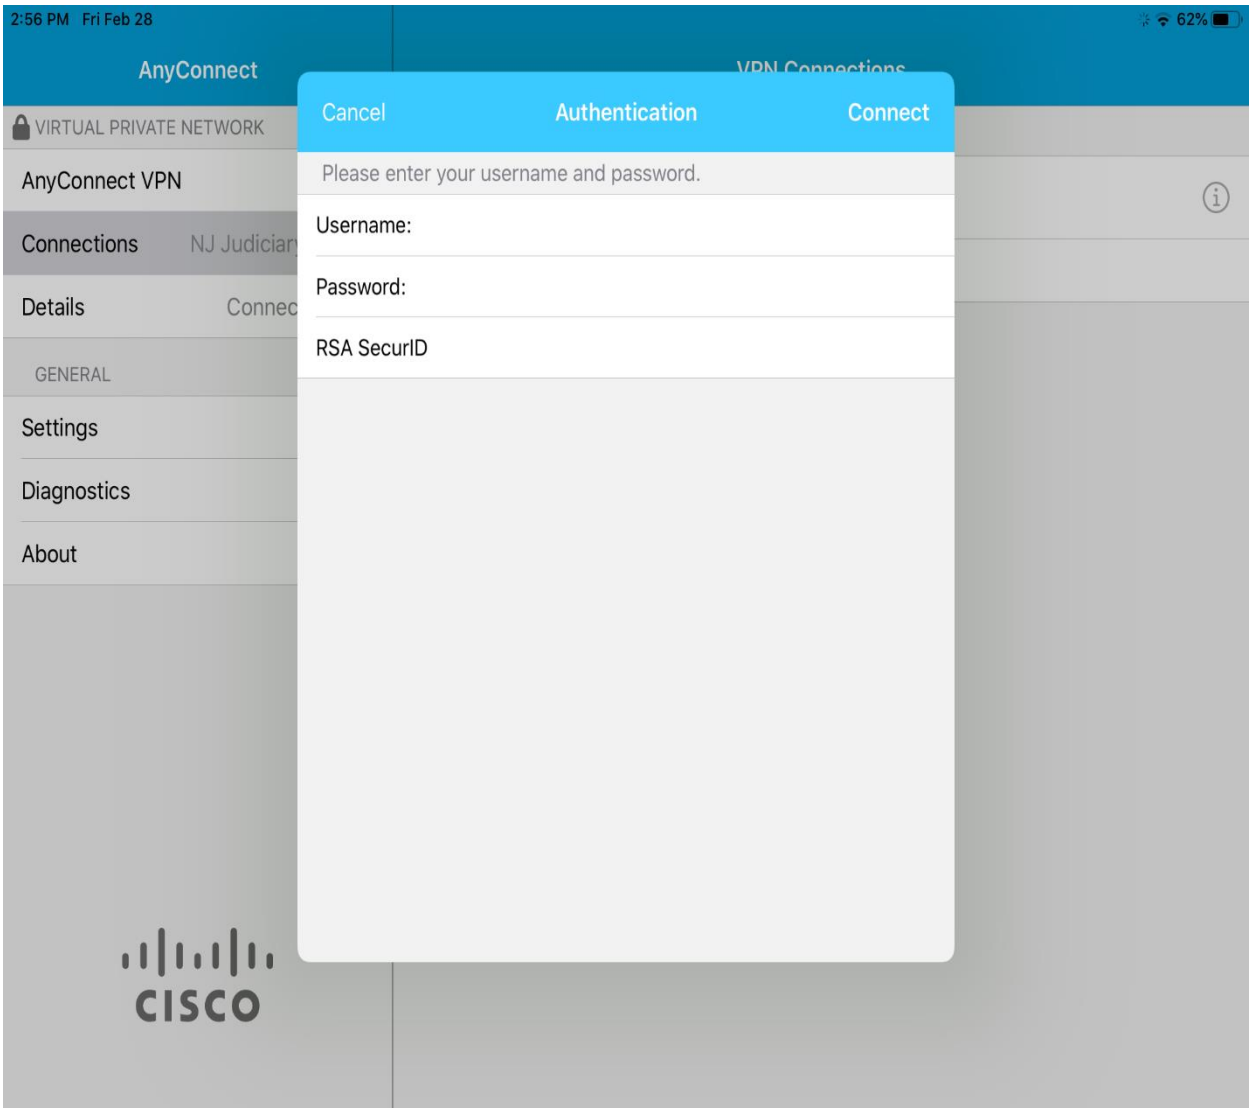


4. Press the Home Button on your iPad (the circle button below the screen)
5. Tap the “AnyConnect VPN” app on the home screen

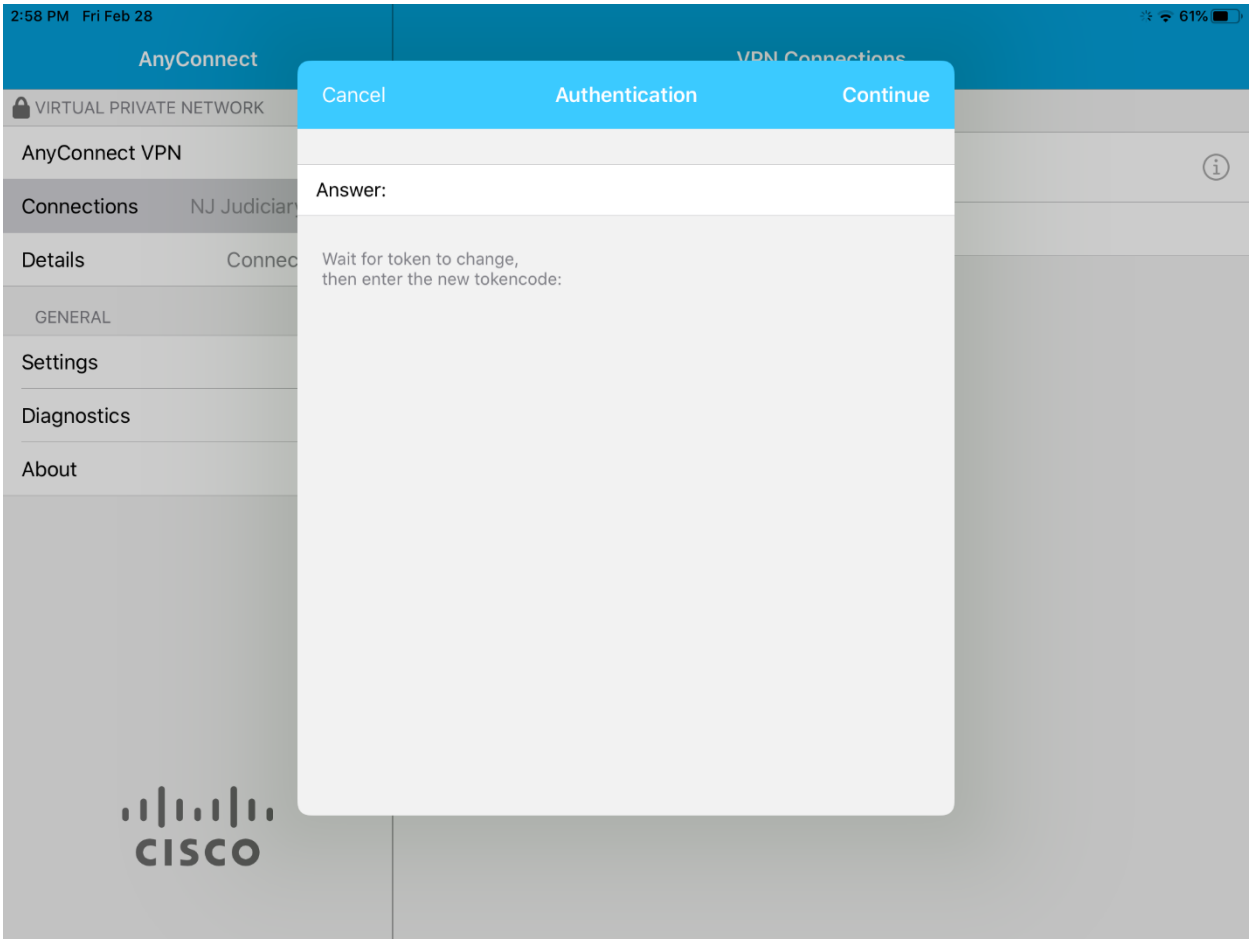
6. Turn on the AnyConnect VPN – if it is not already on



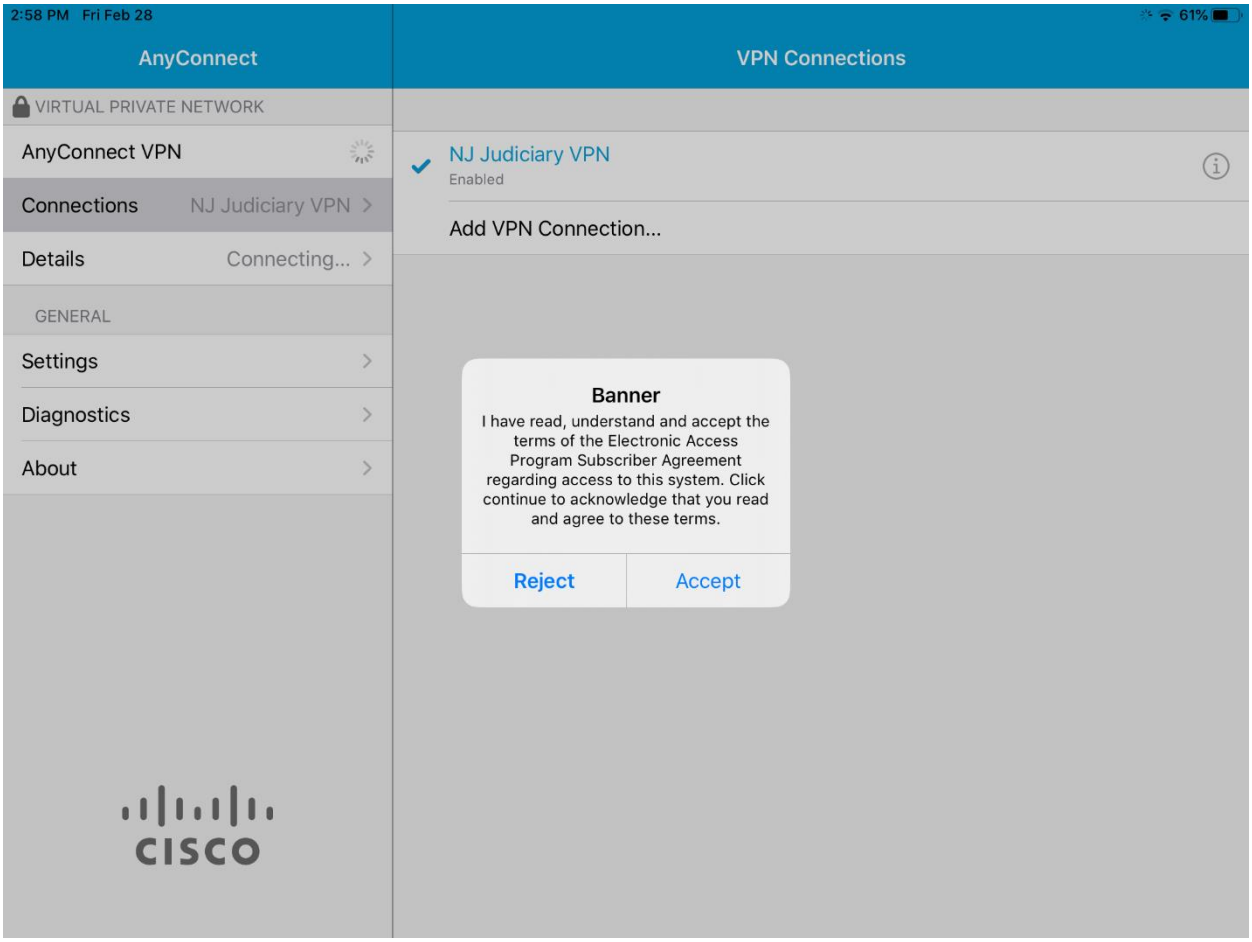
7. An Authentication window will popup. Here input you credentials as followed:
   A. Username: firstname.lastname (Do not put @njcourts.gov)
   B. Current (P-synch) judiciary login password
   C. RSA SecurID – This is your PIN. The one you created when the RSA token was setup. It is 4-8 characters long.
   D. Click Connect (the top right corner of the window)



8. This new window will popup (if your previous credentials are correct).
   A. At or around the same time you will receive a text or email with the On-demand RSA token. It is a random series of 8-10 numbers.
   B. Input those numbers into the blank section next to Answer:
   C. Click connect



9. Click Accept



10. Press the Home button on your iPad to return to your home screen.

You are now connected to the Judiciary's network. If you turn off the VPN, lose Internet connection or power the device down, you will need to repeat these steps to reconnect to the Judiciary's network.
