Subject: [External]Future Court Operations

CAUTION: This email originated from outside the Judiciary organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Continuing remote operations for motions and Special Civil Part proceedings will protect the environment, reduce carbon emissions and reduce traffic on highways by limiting the number of cars driving to and from Courts throughout the State.

Conservatively this would eliminating thousands and likely more than 10,000 car trips per month each way removing well over 100,000 round trips from the highways every year.

In addition it will reduce what less fortunate residents must pay to their attorneys to travel to and from the Courthouse.

Thank you
