Re: Total Objection to the reissuing of the Notice
Of Intent to Foreclose . Docket # F-009564-12

Dear Honorable Judge Mc Veigh ,

Thank you for taking the timeout to read my letter of Objection to Reissuing the Notice Of Intention to Foreclose .I know this may not seen like a big deal to some people however it is a very big deal to me.

Many of these Big Banks and Corporations are sucking the life blood out of the system , first it was the robo-signing and now it the Notice of Intent to Foreclose .

*When will the General Public finally catch a break, many people already believe that {The system isn't Broke it's Fixed } .Where as allowing these Corporations to continue Violating the law and backing things up isn't the way to go, that the **PROBLEM** .*

They made their beds so it is time they lay in it .They knew the law however they were just being Greedy to speed things up and put more hard working families out onto the streets .

What it says on the Supreme Court Of The United States in Washington, DC and I quote (EQUAL JUSTICE UNDER LAW) Those few words do mean a lot to many people both near & far .

And by allowing them to back this train up and run over more people that is what I call being railroaded by the Justice System .

If the Justice System wants the General Public to play by the rules well so must the Corporations . I take this stand very seriously because it does affect my case my Life and my Family's life as well, this is not a joke this is serious business .

Just imagine all of the cases that this ruling can affect and all of the appeals to come This will not help anyone it will just hurt more people who are already hurting from this great down turn in the economy .

The Head of the Consumer Protection Agency Ms Elizabeth Warren said :

"Corporations are not people. People have hearts, they have kids, they get jobs, they get sick, they cry, they dance. They live, they love, and they die. And that matters, because we don't run this country for corporations, we run it for people."

In another case where the Plaintiff argued that it should be able to re-serve the NOI was rejected where as the Judge states that merely allowing the banks to reserve the NOI would eviscerate the statute's plain meaning and effectively reward plaintiff for it's neglect and recklessness regardless of how benign it may appear .

Those are the words from another case where as the Judge also objects to the reserving of the NOI . I am certainly praying that your Honorable Judge Mc Veigh would do the right thing and not allow the reserving of the NOI in which I totally object to.

Thank You And God Bless .

Sincerely,

Ms Elizabeth Blackwell
