RE: ASC 106/1300016163

Docket# F-009564-12

Dear Madame/Sirs:

I strenuously object to any foreclosure procedure on my home at 10-12 Gold Street, Green Brook, New Jersey 08812.

I have been trying to work with ASC since October 2009 (before we defaulted on our mortgage) to ensure a loan modification for my home. It has been a very frustrating process, with ASC consistently asking for the same information to be provided over and over again. I was always told that the same thing: the information was never entered into their system and had been misplaced. For the past few months I really thought that the loan modification was finally coming to a close because the only recent information which has been requested from ASC has been proof of insurance (which has been provided several times).

The whole loan modification process has been so long that, unfortunately, the HUD affiliation: Patrice Simms with First Baptist Church at Lincoln Gardens with whom we were working has since lost their government funding. I am currently working to find another HUD representative with which to work in order to save my home.

Last month another fax was sent to ASC advising that my wife, Helene Wilson, would be working with me and that all information concerning our loan modification can be made available to her. (Again, the service representative could not find past paperwork validating my wife as a contact person entered into the system.) I also indicated that I may need a few weeks to find another HUD representative because I was undergoing Cyberknife treatment for Prostate cancer.

I can forward copies of all past confirmation of faxes/correspondences with ASC if need be; including all HARP and other paperwork previously provided. I am looking forward to resolving this issue with a loan modification for my home ASAP.
